

## FOX Engineer Attends Specialty Conference

March 2007

*Our clients deserve the best solutions to the challenges they face so at FOX Engineering we're staying on top of the regulations and technologies related to industrial and municipal drinking water and wastewater issues.*

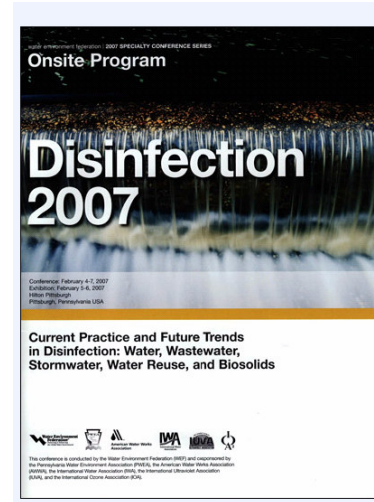

### Pittsburgh, PA

Laurie Twitchell, an engineer with FOX Engineering, is quickly becoming the state's expert when it comes to current disinfection technologies related to Drinking Water/Wastewater/Reuse. FOX Engineering was the only Iowa-based firm in attendance at the Water Environment Federation (WEF) Specialty Conference - **Disinfection 2007** - in Pittsburgh, PA.

While there Laurie attended the following:

- Control of Pathogens Using Disinfection Alternatives for Water Reuse and Wastewater
- Pathogens and Regulatory Issues
- Pathogen Control with UV
- Pathogen Control with Ozone

Here in Iowa, FOX Engineering also has the most experience in the design and construction of alternate disinfection technologies such as Ultraviolet Disinfection. If you have questions about disinfection in general or concerns with future regulations at your facility, FOX Engineering can help you. Please contact us at 800-433-3469.

***FOX Engineering is an environmental engineering firm based in Ames, Iowa. It specializes in water, wastewater, and solid waste management solutions for its diverse governmental and industrial clients. The firm's environmental projects vary in size and scope and can be found throughout the Midwest and beyond.
