

FOX Engineering to provide Integrated Solid Waste Management Training to The Bahamas.

As a subconsultant to SABL – Bahamas LTD, FOX is also teaming with Iowa State University and Shaw Environmental of St. Charles, Illinois, to provide classroom and field instruction to Government employees involved with collection and disposal of solid wastes in the Family Islands. FOX will provide instruction on Supervision of Landfills, Landfill Operation and Maintenance, Environmental Monitoring, and Landfill Engineering Concepts and Contracts to approximately 125 trainees. ISU will focus on Health and Safety issues and Household Hazardous Waste collection, storage, processing and disposal. Shaw Environmental will be involved with public education regarding waste reduction, reuse, and recycling; alternate technologies such as composting, and assistance in Financing and Administration of an Integrated Solid Waste Management Program.

Training will begin in May and be conducted by FOX employees Les Wolfe, P.E.; Doug Luzbetak, P.E.; Todd Whipple, Geologist; and Glenn Hunter, Certified Landfill Operator.

FOX Engineering is an environmental engineering firm based in Ames, Iowa. It specializes in water, wastewater, and solid waste management solutions for its diverse governmental and industrial clients. The firm's environmental projects vary in size and scope and can be found throughout the Midwest and beyond.
