## **Anne Packard Elected Vice-Chairperson of Iowa Geographic Information Council**

Anne Packard, GIS Coordinator for FOX Engineering, has been elected Vice-Chairperson of the Iowa Geographic Information Council (IGIC). IGIC is a group of Geographic Information System (GIS) professionals from the State of Iowa with an interest in promoting GIS use and collaboration in Iowa. The 25-member board has representatives from federal, state, county and city government; regional organizations; universities and colleges; community colleges and K-12 schools; and private businesses.

This is a three-year commitment as Vice-Chairperson, then Chairperson, then Past-Chairperson. Anne looks forward to serving the GIS professionals of Iowa in these roles. "I am very pleased to be working for a company like FOX that encourages everyone to get involved in their professional organizations," she states.

Anne has a Bachelor's of Landscape Architecture from Iowa State University. She has been working in the GIS field for more than 8 years and currently assists municipal and solid waste clients in developing systems that save them time and money by making it easier to get to the information they need, easier to compare dissimilar information, and easier to create output that clearly illustrates the issue at hand.

Find out more by calling Anne at 1-800-433-3469 or by emailing her at: [apackard@foxeng.com](mailto:apackard@foxeng.com).

FOX Engineering Associates, Inc. is based in Ames, Iowa and specializes in water, wastewater, and solid waste management solutions for its diverse governmental and industrial clients. The firm's environmental projects vary in size and scope and can be found throughout the Midwest and beyond. They also serve a select group of cities as the appointed city engineer.
