

## **Steve Troyer, P.E., Named Biosolids Committee Chair for IWPCA**

Steve Troyer, an environmental engineer with FOX Engineering, was recently named Biosolids Committee Chair for IWPCA. He will assume his duties in July of 2006. Steve has been an active committee member since July of 2002.

His duties as committee chair will be to oversee and direct the activities of the biosolids committee. This will include scheduling and presiding over meetings, preparing & distributing meeting minutes, and submitting an annual report of the committee activities to the executive board.

The duties of the biosolids committee include:

- 1) Develop both long and short range goals to keep all members of the Association informed on changes or new policies and methods on land application of biosolids.
- 2) Plan and organize the Annual Biosolids Conference
- 3) Become an active participant in the IDNR rule making process.
- 4) Work with the Education Committee to provide speakers for the State and regional meetings.
- 5) Coordinate with Public Relations and Public Education Committee for the distribution of biosolids information.
- 6) Prepare a written report for the IWPCA annual meeting.
