

Winifred G. Gleason, P.E.

July 2007

FOX Engineering Associates, Inc. of Ames, Iowa, proudly announces the addition of Winifred G. Gleason, P.E., to the firm. Ms. Gleason holds a B.A. in Environmental Sciences, in addition to a Master of Engineering in Civil Engineering. Both degrees were conferred at the University of Virginia, Charlottesville.

Ms. Gleason has more than thirty years professional experience as an environmental engineer. More recent work includes the planning, design, and inspection of construction projects for the City of Ames' water and wastewater treatment plant facilities. Ms. Gleason also gained professional experience in Des Moines, IA; Lexington, KY; and Richmond, Virginia.

Ms. Gleason has participated in numerous local volunteer opportunities, including the City of Ames' Excellence through People initiative. She remains an active member of the American Waterworks Association and the Iowa Section AWWA; the Water Environment Federation and Iowa Water Pollution Control Association; and the non-profit group "Water for People" whose mission lies in improving the quality of water, sanitation, and hygiene in developing countries.

Although a native of Virginia, Ms. Gleason resides in Ames, Iowa, where she has lived for the past twenty-one years. Her husband, Mark, is a plant pathologist at Iowa State University. Her daughter, Kate, attends Marymount Manhattan College in New York City.

FOX Engineering is an environmental engineering firm based in Ames, Iowa. It specializes in water, wastewater, and solid waste management solutions for its diverse governmental and industrial clients. The firm's environmental projects vary in size and scope and can be found throughout the Midwest and beyond. Winnie Gleason can be reached at 800/433-3469 or wgg@foxeng.com
