

FOX Welcomes Aaron Busselot to Firm

February 2010

FOX Engineering Associates, Inc. of Ames, Iowa, proudly announces the addition of Mr. Aaron Busselot, PE, to the firm. Mr. Busselot holds a B.S. in Civil Engineering and a Master of Civil Engineering with an emphasis in Water Resources. Both degrees were conferred at Iowa State University.

In his position at FOX he will provide design services for stormwater utilities, hydrologic and hydraulic investigations, and large municipal projects. Mr. Busselot has been involved with design and construction for a variety of stormwater drainage improvement, flood control, and site development projects.

Mr. Busselot has completed designs for storm sewer systems, large culverts, water quality detention ponds, channel drop structures and grade control structures, natural and urban channel improvements, river bank stabilization, parks, trails, and residential/commercial development.

An avid outdoorsman, Mr. Busselot is originally from DeWitt, Iowa, and now resides in Ames with his wife, Jennifer, who will be working for Iowa State University.

FOX Engineering is an environmental engineering firm based in Ames, Iowa. We specialize in water and wastewater solutions for our diverse governmental and industrial clients.
